

Ergo Hazard Identification

May 19, 2009
 8:30 a.m. - 4:30 p.m.
 Ayr (Cambridge), ON

This 1-day program will provide practice in using the tools that are included in the MSD Prevention Guideline's "Hazard Identification Tool Box" (HIT). Participants will learn to effectively use the risk factor checklists, and will become familiar with the other tools included in the tool box, such as discomfort surveys, feedback surveys, workplace inspection checklists, computer work station checklists, and more. This program will be perfect for your ergo team or JHSC!

Workshop contents:

Toolbox Part A: Getting started

Overview of the MSD PG contents (a map of the many big documents)
 The HIT (3 options), and practice using the HITs
 1-minute survey – tips and tricks

Toolbox Part B: Beyond the basics

Process – how should ergo go?
 Cost benefit analysis – some guidelines
 Policy content – what gets written gets done
 Workplace inspection items – for your JHSC
 Surveys – ask for worker input
 Risk assessment checklist (RAC) – a more detailed checklist, and practice using the RAC – case studies

Toolbox Part C: In-depth risk assessment

When and why should in-depth risk assessment be done?
 How? What tools are available for in-depth assessment?
 Who should do these assessments? (What qualifications are required?)

Next steps

Setting an action plan for implementing the new MSD Prevention Guidelines

Your course fee includes:

1 day of interactive learning, detailed course manual, a copy of the MSDPG HIT,

Registration: Fax this to 519 632-7469, or call for info: 519 632-5103

Or mail it with your cheque to Taylor'd Ergonomics at P.O. Box 1107, Ayr, ON N0B 1E0

Company name	Name(s) of participants	Price
_____	_____	\$355.00
